1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.					
2. This REPORT consists of a total of 4	sheets, including this c	cover sheet.			
This report is also accompanied b	oy ANNEXES, i.e., shee	ets of the description, claims and/or drawings which have been			
	amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).				
These annexes consist of a total of	of sheet(s).				
3. This report contains indications relating	to the following items:				
1 X Basis of the report	·				
II Priority					
	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability				
IV Lack of unity of inventio					
٠		gard to novelty, inventive step or industrial applicability;			
citations and explanation					
VI Certain documents cited					
VII Certain defects in the inte	emational application				
VIII X Certain observations on t	the international applica	ition			
Date of submission of the demand		Date of completion of the report

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1.	1. Statement							
	Novelty (N)	Claims	17,21,27-30,32,34-38		YES			
		Claims	1-16,18-20,22-26,31,33		NO			
	Inventive step (IS)	Claims			YES			
	•	Claims	1-38		NO			
	Industrial applicability (IA)	Claims	1-38		YES			
		Claims	•		NO			

2. Citations and explanations (Rule 70.7)

#### Novelty and Inventive Step

EP 856 871 discloses phosphor coatings layered on the inner surface of a fluorescent lamp as well as many features of the dependent claims. Therefore it discloses all the features of claims 1-3,5,8,9,12,14 and 16, which therefor cannot be considered to be novel or to have an inventive step.

GB 2 301 372 discloses an after glow lamp with a fluorescent layer comprising a long decay phosphor as well as many other features in the dependent claims. Therefore claims 1,2,5,6,8-10, 12,14-16, 22-26 cannot be considered to be novel or to have an inventive step.

EP 1 026 440 discloses a tubular fluorescent lamp with an exterior coating with a pigment of phosphor as well as many of the features defined in the dependent claims. Therefore claims 1,2,8,9,12,14 and 16 cannot be considered to be novel or to have an inventive step.

US 4 245 282 discloses a fluorescent light source with a covering net impregnated with phosphorescent material as well as many of the features defined in the dependent claims. Therefore claims 1,2,5-8,11,15,16 and 18-20 cannot be considered to be novel or to have an inventive step.

GB 1 491 681 discloses a translucent tube with a light at each end and either comprising or having a coating of luminescent material as well as many of the features defined in the dependent claims. Therefore claims 1,2,5,6,13-16 and 18 cannot be considered to be novel or to have an inventive step.

FR 2241743 discloses a control element with a light inside, the control element having a phosphorescent sheet. Therefore claims 1,2,5,13-15 and 18 cannot be said to be novel or to have an inventive step.

WO 02/075205 discloses a light covering with a fluorescent component which is charged from the light element. Therefore claims 1,2,4-9 and 11-16 cannot be said to be novel or to have an inventive step.

WO 01/79753 discloses a decorative cover for a candle made of plastic with a phosphorescent pigment. Therefore claims 1,2,5-8,14 and 18 cannot be said to be novel or to have an inventive step.

WO 00/55278 discloses a coating for a lamp casing with a luminescent pigment. Therefore claims 1,2,5,8,13-16,28 and 31 cannot be said to be novel or to have an inventive step.

US 5 833 349 discloses a lamp shade with its surface coated with a phosphorescent pigment and decorative images. Therefore claims 1,2,5-8,15,16,18,28,30,31 and 33 cannot be said to be novel or to have an inventive step.

EP 807 958 discloses a low pressure mercury vapour discharge lamp with an internal coating of rare earth phosphor layers. Therefore claims 1-3,5,8-10,12 and 14 cannot be said to be novel or to have an inventive step.

Furthermore, the features added by appended claims 17,21,27-30,32,34-38 relate only to conventional manufacturing techniques or are features which are typical in devices of this type and therefore cannot be considered as contributing to patentable ingenuity.

	1.02//203//00/2							
VIII.	Certain observations on the international application							
The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:								
	s 6-10 appear to be directed a different invention. They define a fluorescent light whereas the remaining claims directed to a phosphorescent light.							
Claim	laims 31 and 34 are process claims dependent on to claim 25 which is not an apparatus claim.							
	,
